

DFCC Internet Payment Gateway

The Internet payment gateway service allows Merchants who sell goods and services through e-commerce platforms to receive payments electronically.

Overview

The Internet payment gateway service allows Merchants who sell goods and services through e-commerce platforms to receive payments electronically. This service will be available for micro, small, medium, and large businesses that price their products with varied values. One of the key features is the 'simple payment services', which allows a merchant website integration in a seamless and secure manner.

Payment Gateway Features and Functionality

- Accepts any Visa, Mastercard, Union Pay credit and debit cards for payments.
- In partnership with Bancstac, seamlessly enables acceptance for LankaQR, any American Express, Discover Network and Diners Club cards for payments.
- According to service/products sold the payment settlements will be made based on agreed timelines.
- Affordable pricing to exploit e-commerce opportunities.
- Will be available regardless of the size of business and for those that do not have their own website.
- Payment acceptance enablement through Websites, Social Media Stores and Mobile Apps.
- Real-time reports and insights into each and every transaction accessible through an online portal.
- Provides a fully secured online transactions acceptance facility using industry security standards.
- Seamless integration to online applications through a dedicated IT support team.
